SECRET

C. The task force identified [REDACTED] facilities and assigned a vulnerability category to each. Category I being the most vulnerable -- Category IV, the least. Vulnerability was based upon a number of facts:

25X9A2

- a. Ease of access to the storage area
- b. Sensitivity of stored data
- c. Identification of the building and/or documents with the Agency.

D. The Office of Security proposes to survey all Vulnerability I and II facilities in an attempt to upgrade their physical security.

E. Copies of survey reports will be forwarded to the various Deputy Directors to decide whether continued storage is warranted if a high degree of vulnerability still exists.
